2026 Pipe Masters: title and 2027 qualification

Analysis dated November 3, 2026, after the Philippines Pro. Official WSL rankings downloaded during this analysis. Pipe is CT event 12, scheduled for December 8-20, 2026.

Findings

Six men remain title contenders in normal competition: Yago Dora, Gabriel Medina, Italo Ferreira, Griffin Colapinto, Miguel Pupo and Leonardo Fioravanti. Seven women remain: Molly Picklum, Carissa Moore, Caitlin Simmers, Gabriela Bryan, Erin Brooks, Sawyer Lindblad and Luana Silva.

Medina and Moore hold the scoring advantage when they finish in the same round as the current leaders. At 9th, Medina finishes on 57,190 against Dora's 56,610; Moore finishes on 54,150 against Picklum's 53,695. Dora, Medina, Picklum and Moore each clinch by winning Pipe.

Ethan Ewing is eliminated under normal participation: even winning produces 55,725, below Medina's minimum normal finish of 57,190. Lakey Peterson's maximum is 51,320, below Moore's minimum of 54,150. Everybody ranked below those surfers is also eliminated from the title.

Requalification is much broader than the pasted answer suggested. Points arithmetic leaves potential routes as far down as Matthew McGillivray for men, if he is entered and ranking-eligible, and Bella Kenworthy for women. Oscar Berry and Francisca Veselko cannot reach the CT requalification cutoff through Pipe points.

Conservative certification using placement capacities and seeding floors confirms that current men ranked 1-15 and women ranked 1-9 qualify whatever their normal Pipe result. The tables later give sufficient results for everyone else. These certifications do not assert that every lower-ranked surfer is actually at risk in the eventual heat draw.

Scope and precision

The final-points matrices and rival-score conditions below are exact for the official snapshot and published scoring rules. They assume the full event is held, all listed surfers receive normal competitive finishing results, the top eight retain their advanced seeding, and there are no disciplinary changes, withdrawals, or additional events. The report evaluates CT ranking requalification; Challenger Series qualification and discretionary wildcards are separate routes.

Final named entrants and a valid final heat draw are not established. The official men's seed template retrieved during this analysis lists seed 6 twice and omits seed 8. Consequently, qualification minimum-result paths are explicitly points-based necessary bounds, and guarantees are conservative sufficient results. They are not presented as exact heat-by-heat survival probabilities or as final draw-specific minimum clinches. The exact comparison rule applies to every feasible final draw.

1. Rules that determine the answer

Authority: WSL 2026 Rule Book, rules 1.05-1.10 and Appendix B (page 109), together with the current men's and women's ranking tables. The event page identifies Pipe as event 12. Rules 1.09(b) and 1.10(b) therefore require the best nine results from twelve events, rather than the ten-result rule that applies to a thirteen-event season.

Pipe finish	Men points	Women points	Men slots	Women slots
1st	15,000	15,000	1	1
2nd	11,700	11,700	1	1
3rd	9,125	9,125	2	2
5th	7,115	7,115	4	4
9th	4,980	3,000	8	8
17th	3,240	1,500	8	8
25th	1,500	-	8	-
33rd	750	-	4	-

Use Appendix B's exact rounded values: 5th is 7,115 and 3rd is 9,125. Applying an unrounded 1.5 multiplier would produce the wrong totals. Men's 17th is 3,240; women's 9th is 3,000. Men have four 33rd-place slots, not eight.

The scoring calculation

All 58 published totals reconcile exactly to the best nine scores from the eleven completed events. For each surfer let C be that current total, R the ninth-highest existing event score, and P the Pipe points. Then: final total = C + max(0, P - R). Equivalently, append Pipe to the eleven event scores, discard the three lowest, and sum the remaining nine.

The subtraction is individual. Dora replaces 3,320; Medina replaces 1,000. Picklum replaces 4,745; Moore replaces 2,000. Someone who missed the postseason still drops their lowest counting result when Pipe enters the best nine; two missing events do not mean the entire Pipe score is added.

Advanced seeding and minimum normal finishes

Men: ranks/seeds 1-8 begin in Round 4 (worst normal finish 9th); 9-16 begin in Round 3 (17th); 17-28 begin in Round 2 (25th); the remaining seeds begin in Round 1 (33rd). Women: the top eight start in Round 2 (worst normal finish 9th); the rest start in Round 1 (17th). These floors are why comparing a challenger's maximum against a leader receiving zero is wrong for normal competition.

Ties and alternative qualification

Rule 1.05(c) uses best-counting Regular Season CT results, comparing best to worst, then average heat score. Qualification ties at 22nd/14th have specific rules: an available WSL wildcard may accommodate a tied surfer; otherwise countback and average heat score decide. Do not silently award ties to the surfer currently ranked higher. No title-contender totals tie in the result combinations used in this report.

Marshall and Mamiya have identical distributions of regular-season event results, so their mutual same-place tie cannot be settled by simply citing the current ranking or counting their best event placings. The average-heat-score step and any WSL wildcard decision may matter. Another possible points tie is O'Brien 17th and Chianca runner-up, both on 31,745. Bettylou Sakura Johnson and Nadia Erostarbe also have identical final-point schedules; equal placing bands can produce ties between them.

The next-season routes are top 22 CT men plus 10 eligible Challenger Series men, and top 14 CT women plus 6 eligible Challenger Series women, followed by the specified wildcard arrangements. Rule 1.10(c)(ii) additionally allows a seventh women's CS qualifier if there is no maternity-wildcard applicant. Double qualification moves a CS place down the CS list. Event wildcards do not earn CT ranking points under rule 1.05(d). No discretionary wildcard is assumed here.

2. Men: all title scenarios

In the condition column every listed requirement must hold. Unlisted surfers cannot reach the candidate's total in that scenario, or are excluded by the candidate occupying the sole winner/runner-up position. A finishing band such as 3rd is shared by semifinal losers. Apply the table to feasible heat results; it does not authorize impossible combinations of placings.

Surfer	Now	Replace	1st	2nd	3rd	5th	9th
Yago Dora	54,950	3,320	66,630	63,330	60,755	58,745	56,610
Gabriel Medina	53,210	1,000	67,210	63,910	61,335	59,325	57,190
Italo Ferreira	49,335	3,320	61,015	57,715	55,140	53,130	50,995
Griffin Colapinto	46,195	1,000	60,195	56,895	54,320	52,310	50,175
Miguel Pupo	45,270	2,500	57,770	54,470	51,895	49,885	47,750
Leonardo Fioravanti	45,015	2,500	57,515	54,215	51,640	49,630	47,495
Ethan Ewing	41,725	1,000	55,725	52,425	49,850	47,840	45,705

Ewing is shown for comparison and is eliminated. The title paths for the six contenders are:

Surfer	Pipe	Final total	All required rival results
Yago Dora	1st	66,630	Champion regardless of other results
Yago Dora	2nd	63,330	Gabriel Medina 3rd or worse
Yago Dora	3rd	60,755	Gabriel Medina 5th or worse; Italo Ferreira 2nd or worse
Yago Dora	5th	58,745	Gabriel Medina 9th or worse; Italo Ferreira 2nd or worse; Griffin Colapinto 2nd or worse
Gabriel Medina	1st	67,210	Champion regardless of other results
Gabriel Medina	2nd	63,910	Yago Dora 3rd or worse
Gabriel Medina	3rd	61,335	Yago Dora 3rd or worse
Gabriel Medina	5th	59,325	Yago Dora 5th or worse; Italo Ferreira 2nd or worse; Griffin Colapinto 2nd or worse
Gabriel Medina	9th	57,190	Yago Dora 9th or worse; Italo Ferreira 3rd or worse; Griffin Colapinto 2nd or worse; Miguel Pupo 2nd or worse; Leonardo Fioravanti 2nd or worse
Italo Ferreira	1st	61,015	Yago Dora 3rd or worse; Gabriel Medina 5th or worse
Italo Ferreira	2nd	57,715	Yago Dora 9th or worse; Gabriel Medina 9th or worse; Griffin Colapinto 3rd or worse; Miguel Pupo 3rd or worse
Griffin Colapinto	1st	60,195	Yago Dora 5th or worse; Gabriel Medina 5th or worse
Miguel Pupo	1st	57,770	Yago Dora 9th or worse; Gabriel Medina 9th or worse
Leonardo Fioravanti	1st	57,515	Yago Dora 9th or worse; Gabriel Medina 9th or worse; Italo Ferreira 3rd or worse

Two useful consequences: Medina can be champion with 9th, but Dora cannot. Fioravanti can win the title with a Pipe win only when Dora and Medina are both 9th and Ferreira is 3rd or worse. Pupo also needs a win and both leaders 9th, but can survive Ferreira finishing runner-up (57,715 against Pupo's 57,770).

3. Women: all title scenarios

Every listed condition is required simultaneously. Women's 9th contributes 3,000 points, and Picklum discards that entire Pipe result if she exits there. The final total remains 53,695.

Surfer	Now	Replace	1st	2nd	3rd	5th	9th
Molly Picklum	53,695	4,745	63,950	60,650	58,075	56,065	53,695
Carissa Moore	53,150	2,000	66,150	62,850	60,275	58,265	54,150
Caitlin Simmers	49,610	2,000	62,610	59,310	56,735	54,725	50,610
Gabriela Bryan	46,865	2,000	59,865	56,565	53,990	51,980	47,865
Erin Brooks	44,745	2,000	57,745	54,445	51,870	49,860	45,745
Sawyer Lindblad	44,055	2,000	57,055	53,755	51,180	49,170	45,055
Luana Silva	43,325	2,000	56,325	53,025	50,450	48,440	44,325
Lakey Peterson	38,320	2,000	51,320	48,020	45,445	43,435	39,320

Surfer	Pipe	Final total	All required rival results
Molly Picklum	1st	63,950	Champion regardless of other results
Molly Picklum	2nd	60,650	Carissa Moore 3rd or worse; Caitlin Simmers 3rd or worse
Molly Picklum	3rd	58,075	Carissa Moore 9th or worse; Caitlin Simmers 3rd or worse; Gabriela Bryan 2nd or worse
Molly Picklum	5th	56,065	Carissa Moore 9th or worse; Caitlin Simmers 5th or worse; Gabriela Bryan 3rd or worse; Erin Brooks 2nd or worse; Sawyer Lindblad 2nd or worse; Luana Silva 2nd or worse
Carissa Moore	1st	66,150	Champion regardless of other results
Carissa Moore	2nd	62,850	Molly Picklum 3rd or worse
Carissa Moore	3rd	60,275	Molly Picklum 3rd or worse; Caitlin Simmers 2nd or worse
Carissa Moore	5th	58,265	Molly Picklum 3rd or worse; Caitlin Simmers 3rd or worse; Gabriela Bryan 2nd or worse
Carissa Moore	9th	54,150	Molly Picklum 9th or worse; Caitlin Simmers 9th or worse; Gabriela Bryan 3rd or worse; Erin Brooks 3rd or worse; Sawyer Lindblad 2nd or worse; Luana Silva 2nd or worse
Caitlin Simmers	1st	62,610	Carissa Moore 3rd or worse
Caitlin Simmers	2nd	59,310	Molly Picklum 3rd or worse; Carissa Moore 5th or worse; Gabriela Bryan 3rd or worse
Caitlin Simmers	3rd	56,735	Molly Picklum 5th or worse; Carissa Moore 9th or worse; Gabriela Bryan 2nd or worse; Erin Brooks 2nd or worse; Sawyer Lindblad 2nd or worse
Caitlin Simmers	5th	54,725	Molly Picklum 9th or worse; Carissa Moore 9th or worse; Gabriela Bryan 3rd or worse; Erin Brooks 2nd or worse; Sawyer Lindblad 2nd or worse; Luana Silva 2nd or worse
Gabriela Bryan	1st	59,865	Molly Picklum 3rd or worse; Carissa Moore 5th or worse
Gabriela Bryan	2nd	56,565	Molly Picklum 5th or worse; Carissa Moore 9th or worse; Caitlin Simmers 5th or worse; Erin Brooks 3rd or worse; Sawyer Lindblad 3rd or worse
Erin Brooks	1st	57,745	Molly Picklum 5th or worse; Carissa Moore 9th or worse; Caitlin Simmers 3rd or worse
Erin Brooks	2nd	54,445	Molly Picklum 9th or worse; Carissa Moore 9th or worse; Caitlin Simmers 9th or worse; Gabriela Bryan 3rd or worse; Sawyer Lindblad 3rd or worse; Luana Silva 3rd or worse
Sawyer Lindblad	1st	57,055	Molly Picklum 5th or worse; Carissa Moore 9th or worse; Caitlin Simmers 3rd or worse
Luana Silva	1st	56,325	Molly Picklum 5th or worse; Carissa Moore 9th or worse; Caitlin Simmers 5th or worse; Gabriela Bryan 3rd or worse

Picklum must at least reach the quarterfinals to be champion; Moore can win with 9th if every listed threat also stays below 54,150. Brooks can still win the world title as Pipe runner-up, but Lindblad and Silva must win the event. Peterson is shown in the points table for comparison and is eliminated.

4. Requalification: how to read every scenario

A man requalifies through the CT if no more than 21 ranking-eligible rivals finish ahead of him; a woman if no more than 13 finish ahead of her. For any chosen Pipe placing, use the final total in section 6, compare it against every rival's total, and apply the qualification tie procedure where needed. This is the complete rule for every combination of results.

The accompanying qualification-conditions.md expands that rule into a ready-made rival-threshold list for every surfer and every normally available Pipe finish. It tells you who is unavoidably ahead, who can still pass, the exact rival finish that passes, and whether any tie needs resolution. It is the detailed scenario appendix to this report.

Certified safe through normal competition

Men: Dora, Medina, Ferreira, Colapinto, Pupo, Fioravanti, Ewing, Igarashi, Robinson, Pittar, Vaast, Samuel Pupo, O'Brien, Moniz and O'Leary (current ranks 1-15). Women: Picklum, Moore, Simmers, Bryan, Brooks, Lindblad, Silva, Peterson and Nichols (current ranks 1-9). These certificates allow all legal placing capacities and entry-round floors, including adverse ties; a final draw may protect additional surfers.

Men: lower-ranked qualification requirements

Necessary result = the weakest finish for which a points-based path survives the aggregate placement-capacity check; it may still need a compatible heat draw and help. Sufficient result = this finish or better guarantees top 22 even under the aggregate worst case; a weaker finish may also qualify. A dash means no such result. This distinction prevents turning a mathematical bound into a claim about the final draw.

Rank	Surfer	Current	Necessary result	Sufficient result	Win total
16	Cole Houshmand	26,830	17th	9th	40,830
17	Marco Mignot	25,770	25th	9th	39,770
18	Morgan Cibilic	25,610	25th	9th	39,610
19	Filipe Toledo	25,395	25th	9th	39,395
20	Callum Robson	24,875	25th	5th	38,875
21	Joao Chianca	21,045	25th	2nd	35,045
22	Jake Marshall	19,705	25th	2nd	33,705
23	Barron Mamiya	19,705	25th	2nd	33,705
24	Alan Cleland	18,810	17th	2nd	32,810
25	Crosby Colapinto	17,385	9th	1st	31,385
26	Mateus Herdy	15,990	9th	1st	30,490
27	Alejo Muniz	15,960	5th	1st	29,960
28	Rio Waida	15,065	5th	-	29,065
29	Ramzi Boukhiam	12,585	3rd	-	27,085
30	Joel Vaughan	12,245	3rd	-	26,745
31	Eli Hanneman	10,820	2nd	-	25,320
32	Luke Thompson	9,820	2nd	-	24,320
33	Jordy Smith	8,820	1st	-	23,320
34	Matthew McGillivray	5,820	1st	-	20,820
35	Oscar Berry	5,000	No CT path	-	19,500

McGillivray's route is conditional on receiving an entry and retaining ranking eligibility. The rankings alone do not give a replacement an automatic Pipe invitation. Jordy Smith's route is likewise conditional on returning and competing. Berry's maximum of 19,500 is below the minimum final total of at least 22 other ranked men, so he cannot requalify through CT points.

5. Women's qualification and cutoff examples

Rank	Surfer	Current	Necessary result	Sufficient result	Win total
10	Bettylou Sakura Johnson	30,660	17th	5th	44,660
11	Nadia Erostarbe	30,660	17th	5th	44,660
12	Caroline Marks	30,320	17th	5th	43,320
13	Tyler Wright	28,630	17th	5th	42,630
14	Yolanda Hopkins	26,575	17th	3rd	40,575
15	Anat Lelior	20,545	3rd	-	34,545
16	Alyssa Spencer	20,170	3rd	-	34,170
17	Stephanie Gilmore	19,000	3rd	-	33,000
18	Brisa Hennessy	18,085	2nd	-	32,085
19	Tya Zebrowski	17,800	2nd	-	31,800
20	Vahine Fierro	16,745	2nd	-	30,745
21	Sally Fitzgibbons	15,000	1st	-	29,000
22	Bella Kenworthy	14,745	1st	-	28,745
23	Francisca Veselko	12,000	No CT path	-	26,000

Veselko's maximum is 26,000. All current top 14 have minimum normal totals above that number; she cannot requalify through CT points. Every other woman has a points-based route, subject to the final draw and other surfers' results. A Pipe win alone is not a universal guarantee for the lower-ranked women, because enough current qualifiers can also improve.

Yolanda Hopkins: precise first-round-exit scenario

If Hopkins finishes 17th, she ends on 27,075. All current top 13 are necessarily ahead of that. Her CT qualification therefore requires nobody below her to pass 27,075. She misses the top 14 if any of the following happens:

Challenger	Result that passes Hopkins	Final total at that result
Anat Lelior	3rd or better	28,670
Alyssa Spencer	3rd or better	28,295
Stephanie Gilmore	3rd or better	27,125
Brisa Hennessy	2nd or better	28,785
Tya Zebrowski	2nd or better	28,500
Vahine Fierro	2nd or better	27,445
Sally Fitzgibbons	Win	29,000
Bella Kenworthy	Win	28,745

Gilmore finishing 3rd passes Hopkins by only 50 points. If Hopkins finishes 9th, her total is 28,575: Lelior's 3rd still passes her by 95, but Spencer and Gilmore then need the final, Zebrowski and Fierro need wins, and Hennessy's runner-up still passes. Fitzgibbons and Kenworthy can still pass with wins. Hopkins reaches 34,700 with 3rd, above every current outsider's maximum, guaranteeing qualification.

Jake Marshall and Barron Mamiya: precise early-exit scenario

Both have 19,705 now and replace 1,000, so they have identical final-points schedules. At 25th each finishes on 20,205, while all current top 21 are necessarily ahead. An early exit therefore leaves a single cutoff place, exposed to their mutual tie and every other challenger.

Results that pass 20,205: Alan Cleland 17th or better; Crosby Colapinto or Mateus Herdy 9th or better; Alejo Muniz or Rio Waida 5th or better; Ramzi Boukhiam or Joel Vaughan 3rd or better; Eli Hanneman or Luke Thompson 2nd or better; Jordy Smith or Matthew McGillivray a win. Any such passing result eliminates an early-exiting Marshall or Mamiya from the top 22. If neither is passed and both finish 25th, the qualification tie rules decide the final spot or possible wildcard accommodation.

6. Full final-points matrices

A dash marks a placing unavailable under the assumed current entry-round seeding. These tables cover all 58 ranked surfers and use the individual replacement score R. They supply exact totals for every normal competitive outcome. The qualification appendix applies the rival thresholds for each row and outcome.

Men

Surfer	R	1st	2nd	3rd	5th	9th	17th	25th	33rd
Yago Dora	3,320	66,630	63,330	60,755	58,745	56,610	-	-	-
Gabriel Medina	1,000	67,210	63,910	61,335	59,325	57,190	-	-	-
Italo Ferreira	3,320	61,015	57,715	55,140	53,130	50,995	-	-	-
Griffin Colapinto	1,000	60,195	56,895	54,320	52,310	50,175	-	-	-
Miguel Pupo	2,500	57,770	54,470	51,895	49,885	47,750	-	-	-
Leonardo Fioravanti	2,500	57,515	54,215	51,640	49,630	47,495	-	-	-
Ethan Ewing	1,000	55,725	52,425	49,850	47,840	45,705	-	-	-
Kanoa Igarashi	2,500	51,655	48,355	45,780	43,770	41,635	-	-	-
Jack Robinson	2,500	47,465	44,165	41,590	39,580	37,445	35,705	-	-
George Pittar	1,000	46,450	43,150	40,575	38,565	36,430	34,690	-	-
Kauli Vaast	1,000	44,120	40,820	38,245	36,235	34,100	32,360	-	-
Samuel Pupo	1,000	43,960	40,660	38,085	36,075	33,940	32,200	-	-
Liam O'Brien	1,000	43,505	40,205	37,630	35,620	33,485	31,745	-	-
Seth Moniz	1,000	41,810	38,510	35,935	33,925	31,790	30,050	-	-
Connor O'Leary	1,000	41,185	37,885	35,310	33,300	31,165	29,425	-	-
Cole Houshmand	1,000	40,830	37,530	34,955	32,945	30,810	29,070	-	-
Marco Mignot	1,000	39,770	36,470	33,895	31,885	29,750	28,010	26,270	-
Morgan Cibilic	1,000	39,610	36,310	33,735	31,725	29,590	27,850	26,110	-
Filipe Toledo	1,000	39,395	36,095	33,520	31,510	29,375	27,635	25,895	-
Callum Robson	1,000	38,875	35,575	33,000	30,990	28,855	27,115	25,375	-
Joao Chianca	1,000	35,045	31,745	29,170	27,160	25,025	23,285	21,545	-
Jake Marshall	1,000	33,705	30,405	27,830	25,820	23,685	21,945	20,205	-
Barron Mamiya	1,000	33,705	30,405	27,830	25,820	23,685	21,945	20,205	-
Alan Cleland	1,000	32,810	29,510	26,935	24,925	22,790	21,050	19,310	-
Crosby Colapinto	1,000	31,385	28,085	25,510	23,500	21,365	19,625	17,885	-
Mateus Herdy	500	30,490	27,190	24,615	22,605	20,470	18,730	16,990	-
Alejo Muniz	1,000	29,960	26,660	24,085	22,075	19,940	18,200	16,460	-
Rio Waida	1,000	29,065	25,765	23,190	21,180	19,045	17,305	15,565	-
Ramzi Boukhiam	500	27,085	23,785	21,210	19,200	17,065	15,325	13,585	12,835
Joel Vaughan	500	26,745	23,445	20,870	18,860	16,725	14,985	13,245	12,495

7. Verification, limitations and sources

Checks completed

Parsed the individual event points and published totals for 35 ranked men and 23 ranked women directly from WSL HTML. Confirmed every total equals the best nine of eleven. Retained official starred/replacement and injury points rather than dropping them accidentally. Nichols' starred 7,800 and McGillivray's replacement results are included. Every projected result was independently checked by appending the actual Pipe points and summing the best nine of twelve.

Title conditions compare each contender against all other ranked surfers, including both current leaders and other challengers. There are no equal championship totals among the live scenarios. Qualification bounds use an assignment optimization over actual finish-band capacities and the normal entry-round floors; equal totals were treated in both directions rather than awarded on assumed tiebreaks.

What remains contingent

The public draw is provisional, and the men's seed template is internally inconsistent. Named entrants, withdrawals, final seed adjustments, replacements, and their eligibility must be confirmed before using any provisional path as a specific heat prediction. Aggregate ranking bounds allow all placement assignments satisfying capacities and floors; some may be impossible in the final bracket. Thus the sufficient-result certificates are valid conservative guarantees, while the points-based minimum results are necessary bounds and not promises of a feasible route.

Withdrawal and no-show scenarios are outside the ordinary finish tables. In particular, if an advanced seed withdraws, its normal minimum-finish points cannot simply be assumed. Title-contender counts and qualification certificates would need recomputation using WSL's awarded withdrawal points. Challenger Series standings and wildcard applications were not used to declare additional surfers qualified; their routes must be assessed separately under the rules.
